MEMORANDUM FOR: Director of Central Intelligence

Bill:

1. You might recall a previous conversation we had concerning invitees to your forthcoming seance with Deputies at [ ] in February. As a result of that conversation, George Carver and [ ] were "disinvited" on the proper basis that the meeting is to be focused on the Agency per se.

2. While I have no portfolio as the Conference organizer or anything else, I think maybe there is another area on the invitee list that should be brought to your attention. [ ] obviously will be there because he is on the agenda to make a presentation. John Warner, I know, feels he should be there but has not been explicitly invited. I believe there is also merit, in this day and age, in having George Cary present. If you agree with my observations, I will be happy to quietly take care of the matter.
